## DETAILED ACTION

### ***Claim Objections***

1. Claim 1 is objected to because of the following informalities: In Claim 1 Line 11, "the short direction" should read – **a** short direction --. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 6-11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Shikama (5,671,993).

Shikama discloses a rear projection apparatus comprising:

an illuminated spatial modulator (3);

a projection optical system including an L-shaped optical unit (See Figure 5)

having a pair of lens groups (G3) and (G1) and a reflecting device (M) disposed therebetween which projects the illuminated image directly upon a screen.

As seen in figure 59(o) the optical axis may be bent along a vertically extending plane orthogonal to a center of the screen and image light is directly incident on the screen.

Further, as noted in figures 58(b) and 60(b) the light source(120) may be positioned at different orientations (vertically or horizontally disposed) relative to the

output direction from the optical system. The projection device is disclosed as preferably comprising color separation and synthesizing means.

***Allowable Subject Matter***

3. Claims 1-5 are allowed.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C. Dowling whose telephone number is 571-272-2116.
